Kitchen Appliances

Stove

If the stove isn’t working, try holding down the LOCK button for 3–5 seconds to disable the safety lock.

If it still doesn’t turn on, ensure you’ve placed a pot or pan on the element—our stove uses induction technology, which requires a compatible metal cookware item to activate.

If neither of these steps resolves the issue, turn the oven off at the main switch located behind it, wait for 10 seconds, and then turn it back on.
