Important Tankless Hot Water System Instructions

? Tankless Hot Water System

Your hot water works by **flow rate** — not temperature dials. Think of it like this:

? **More Flow = Quicker Warm Up, Less Heat**

? **Less Flow = Slower Warm Up, But HOTTER Water**

? **Too Little Flow = Cold Surprise ???**

? Pro Tips for Tub, Shower & Sink Bliss

? **Turn on the HOT valve fully at first** — this gets the water moving and warms it up faster!

? **Give it a moment** — the water has to travel from the magic heater box to your tub/shower/sink. It's worth the wait.

? **Want it hotter?** Slowly back down the hot valve to reduce the flow a bit. Less flow = more heat!

? **Don't go too far!** Back it off *too much*, and the heater gets confused... cue the cold water shock! ?

???? Think of It Like Wizardry!

You're not just turning knobs — you're casting spells! ?

? Full-on = cool and fast

? Medium flow = steamy goodness

? Too low = ice bucket challenge

? Now you're a Hot Water Hero! ?

Enjoy endless luxurious soaks, steamy showers, and relaxing hand-washing in total comfort. ??

Need help? Just holler — we're here to keep your hot water dreams alive! ?

Service Animals

? Service Animals Are Welcome!

We're happy to accommodate legitimate service animals that assist with a disability. ?
To ensure a safe and comfortable stay for all guests (and critters), here's our policy — made easy to follow:

? What's Allowed:

- Service animals that are well-behaved, housebroken, and under your control at all times
- Animals that meet **licensing and vaccination** requirements in your home state/city
- Service animals that are **leashed**, harnessed, or under **reliable verbal command**
- Guests who notify us **in advance** that they're bringing a service animal ?

? What's Not Allowed:

- Animals with a history of aggression toward people or other pets
- Indoor piddle pads — all service animals must be fully housebroken
- Leaving your service animal unattended
- Barking, biting, chewing, or destructive behavior (yep, we'll have to ask you both to leave if this happens)
- Climbing on furniture or counters unless medically necessary

? Clean-Up Rules:

Please bring your own "poo bags" and dispose of waste in the **large exterior trash bins**.
Sanitation matters — so please keep things clean and respectful.

? Heads up:

It's against the law to misrepresent a pet as a service animal.
Fraudulent claims = fines and legal trouble ?
Let's all keep it honest and respectful!

Thanks for understanding and helping us keep our space safe, relaxing, and 5-star ready for everyone! ?

Noise

Noise & Quiet Hours

? Shhh... It's Quiet Time! ??

We love good vibes and great convos — but after **10 PM**, it's time to dial it down so everyone (including the neighbors!) can catch some Zzz's ?

- ? Keep music low after 10 PM
- ?? If you're chatting outside, use your "indoor voices"
- ? Getting a little lively? Just take the fun inside!

Let's keep the peace and the 5-star reviews rolling in ? Thanks for being awesome!

Rubbish & Recycle

?? Trash Talk (the good kind!)

Before you head out, please toss out the trash from the indoor bins. ??
Our cleaning crew may not arrive right away, and this little step keeps things smelling fresh and pest-free for the next lucky guest (and saves us from surprise science experiments ??).

Thanks a bunch — you rock! ??

Hot Water & Jacuzzi Drain

Hot Water & Jacuzzi Drain

Hot Water & Jacuzzi Drain

? Using the Tankless Water Heater

Our home uses a **tankless water heater**, which means it heats water **as it flows**—there's no hot water tank. The **speed of the water flow** affects how hot it gets.

Here's how to get the best temperature:

1. **Turn on the hot water slowly.**

- If you **turn the handle all the way up**, the water flows **very fast**, so it doesn't have much time to heat up.
? The water will be **warm but not very hot**.

2. **To make it hotter, turn the handle back a little.**

- Slowing the water gives the heater more time to warm it up.
? The water will get **hotter** as you turn it back slightly.

3. **Don't turn it back too far.**

- If you close the handle too much, it will **shut off the hot water** completely and you'll get **only cold water**.

? **Tip:** Adjust slowly until you find the "sweet spot" where the water is hot and steady.

?? Jacuzzi Time! (But First, Let's Talk Drain Drama)

Our **two-person jacuzzi tub** is ready for bubbles, bliss, and your best soak ever — but first, let's make sure the water stays *in* the tub, not running down the drain! ?

? Where's the Drain Control?

Look at the **top center of the back wall** of the tub — right where the water flows out.

Just **below** that is a shiny, round **chrome disc**. That's not just decoration — it's the **overflow drain AND your magic twisty knob** to open and close the main drain!

? How to Use It:

Give it a gentle **twist left or right** and watch the drain pop open or shut like magic.

? **Closed = Tub Fills**

?? **Open = Water Goes Bye-Bye**

? Need help spotting it?

Check out the **photo we provided** — it'll show you *exactly* what you're looking for!

? Pro Tip: Fill it up, get those jets going, and soak your cares away... but make sure the drain is closed first or your spa dreams might go *down the drain!* ?

Now go on, treat yourself — you've earned it! ???
