Start by adding the guide to your phone...

When you loaded this on your phone you'll have noticed a prompt to add it to your home screen. It's optional of course, but we think you'll prefer that to fumbling through your emails or texts when you need to look something up! Plus it makes it accessible if you're ever offline.

Don't see the prompt?

Try opening it in your full web browser... you may need to long-press the link and copy it before opening in Safari (for iPhone)/Chrome (for Android).

Print or save a PDF

Tap the print button at the top of the page to generate a PDF, then decide whether to print certain pages ahead of your trip. That said, we recommend adding the app to your home screen (as detailed above) for a better experience.

What next?

Please relax, unwind, have fun, and enjoy your stay!
