Our check-in and check-out times are set to ensure a smooth transition between guests, as there may be another booking before or after yours. We'll provide you with an access code prior to your arrival so you can check yourself in with ease.

Early check-in may be an option depending on availability. If you're planning to arrive before the standard check-in time, please reach out to us, and we'll see if we can make arrangements—though we can't guarantee it.

Should you get here ahead of schedule, be sure to check out our **MAP** below, where we've put together a list of nearby places to visit and things to do while you wait.

Check-in is completely self check-in using a smart lock.

Your door code is: {{door_code}}. Please note this code will only be active during your reservation and will automatically expire after your checkout time. **Please also note that the deadbolt is not controlled by the smart lock.**

To light up the Schlage keypad, you can hit the Schlage logo at the top of the lock's screen. To unlock the door type your code {{door_code}} and the door will automatically unlock. To lock the door from the outside, click the padlock button with the X on it.

Fire Pit

Please feel free to use the fire pit outside. Please be respectful of neighbors late at night and keep outside noise to a minimum. We do not provide fire wood but you can buy small wood bundles at a local store like Bassett's Market.

Please do not leave fires unattended.

[Grill](#)

Grill

The grill is located just outside the front door. We do not monitor the propane, **if you find the tank is empty you will need to exchange the propane tank at a local store or gas station.**

Please clean the grill after use, excessive grill cleaning is not included in our normal fee from our cleaning team.

[Thermostat](#)

Ecobee Thermostat

The house is equipped with an Ecobee thermostat that is located on the wall in the living room that controls the central air conditioning/heat in the property.

Using the Thermostat to Control Temperature:

1. To change the set temperature, tap the temperature in the middle of the screen and use the + - on the screen to increase/decrease the set temperature.
2. To change thermostat modes, tap the current mode icon (either fire or snowflake) in the middle of the top row on the screen and select the mode you'd like.

We would appreciate if you would help us conserve energy by refraining from setting the temperature too extreme and by altering the set temperature up or down if you're going to be gone from the house for an extended period.

If you have any issues setting the temperature or using the thermostat - please feel free to contact us:
